

Deltarack is an economical, light and practical solution for the storage and transport of flat material that needs to stand upright, is fragile, and must be protected against scratching. This solution is an affordable, light weight rack designed for handling flat products, such as stone or glass. Made of glued/pressed 13 layer birch plywood, the patented A-frame design is strong enough to safely handle 2,000 lbs. The racks are bundled flat and can be assembled and ready for use in minutes. All hardware is included.

All products are based on the same delta profile and made out of water-resistant glued birch plywood. At the bottom, the Deltaracks include an integrated pallet for easy usage from all four sides with a forklift or pallet jack. For small movements at the work site, we have developed wheel sets and wheel boards mounted or used temporarily, as needed.

All racks are shipped flat - bundled - not assembled. The only tools required is a rubber mallet and a powered screwdriver. The racks can be assembled in minutes. Minimum order is 6 racks per part number.

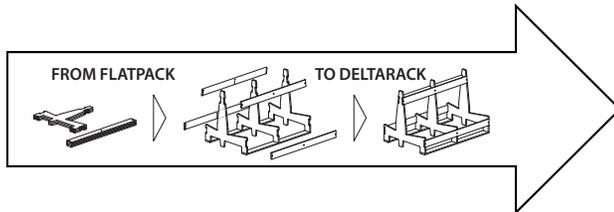

User Benefits

- **IG, Glass, Stone, Marble, Wood, Metal & more**
- Low cost rack
- Strong, lightweight rack
- For storage, handling, or shipping
- Forklift or pallet truck access from 4 sides

Bulk pricing = 20 or more of the same rack ordered. The weight capacity shown is an estimate resulting from static tests in defined circumstances. | <http://deltarackusa.com> | orders@leadingedge95.com | 440.786.2444

ACCESORIES

Wheel Board Set

Wheel Boards are designed to fit securely between the Uprights (ribs) allowing mobility of your Deltarack. They can be permanently secured to the rack, or simply held by the weight of the rack, enabling the wheel boards to be removed as needed.

Each set comes with 2 swivel locking wheels and 2 fixed directional wheels. The wheels are high quality, pressed steel frame, with thermoplastic polyurethane wheel and tread.

All hardware is included.

Safety Clamp

Safety Clamps are used to quickly secure items loaded on the Deltarack. Recommended for racks which are used internally to transport items in a shop/plant environment.
